

Product Data Sheet

WILFRO ML 6120

WILFRO ML 6120 is a low treat rate soluble oil package. The product is designed for drilling, milling, reaming, sawing, threading and turning applications. This is also compatible to work with various alloys both ferrous and non-ferrous containing materials, such as Aluminum and Copper. This inherently low foaming technology is not only designed to meet with modern day machining demands of higher pressures and smaller sump volumes. WILFRO ML 6120 blended product also offers stable emulsions in both soft and harder waters. WILFRO ML 6120 blended with multiple lubricity and EP additives.

Technical Data:

Composition: Mixture of corrosion inhibitors and emulsifying agents

Appearance: Dark brown fluid

Density, 30°C (DIN 51757): approx. 1.00g/ml

free flowing

Storage Conditions:

Store in a dry place at room temperature approx. 12 months

Handling:

Consult material safety data sheet (MSDS) for additional handling information on WILFRO ML 6120.

Warranty:

The information furnished here is based on our research and is believed to be correct. No warranty is expressed or implied.
